FSC Mixed Sources

The timber or fibre in the product is a mixture of some/all of the following:

- Timber from an FSC-certified forest
- Post-consumer reclaimed material
- Controlled Sources, which exclude unacceptable forestry

CONTENTS

Foreword by Professor David Haslam	ix
Foreword by Professor Gene Feder	xi
Preface	xiii
Acknowledgements	xix
Dedication	xxv
INTRODUCTION	1
<i>The problem. Models and paradigms.</i>	
PART 1 – A CHRONIC DIS-EASE	
Chapter 1 – The Challenge	23
<i>A point of view. The broken marriage. Keeping the balance.</i>	
Chapter 2 – Evolution and struggle	31
<i>The rise of scientific medicine. The contemporary struggle. The disease in medicine. The illness, the disease and the story. How doctors think. Scientia and caritas. The remodelling movement. Remodelling or metamorphosis?</i>	
Chapter 3 – Momentum for change	49
<i>Fitness for purpose. Scientific medicine. What will 'different' look like? Signs and symptoms of change. What sort of model? The goal of the model. Unhappily preoccupied with health.</i>	
PART 2 – PERSPECTIVES	
Prologue	69
<i>'Medical nemesis'? The paradox.</i>	
Chapter 4 – Medicine and society	77
<i>The medicalisation of life. Medicine, politics and economics. The context of care. The National Health Service is unwell. Quality of care. Inequality. Healthcare policy.</i>	

Chapter 5 – Medicine and the individual	95
<i>Neglect of the person. Reinstating the individual. The limits of personal competence. Autonomy. Medical hubris and individual responsibility.</i>	
Chapter 6 – Medicine and science	107
<i>The scientific attitude. Screening. Normality and significance. The goal of science.</i>	
Chapter 7 – Medicine and healing	115
<i>Medicine's responsibility for healing. Right relationship. Healing, treatment and cure.</i>	
Chapter 8 – The patient's perspective	123
<i>Being a patient. Awareness, participation and choice. Relationship. Continuity of care.</i>	
Chapter 9 – Medicine in crisis?	149
<i>A crisis of cost and resources. Modern medicine is increasingly dangerous. Mechanistic healthcare undermines well-being. Medicine is losing its vocational commitment. A crisis of morale. Medicine colludes in its own devaluation. A crisis of morality. Resolving the crisis.</i>	
PART 3 – MAINTAINING CAUSES	
Chapter 10 – Truth, proof and evidence	163
<i>Attitudes to evidence. Reality, truth and knowledge. Personal knowledge. Evidence. Ways of knowing. Conclusion.</i>	
Chapter 11 – Change and resistance to change	189
<i>A changing scene. The problem with paradigms. The pros and cons of science. Border disputes, or reconciliation and 'traffic in truth'. Poetry and science. Resistance to change. The influence of technology and pharmaceuticals. Institutional inertia. The example of complementary medicine.</i>	
PART 4 – THE DIRECTION OF CURE	
Chapter 12 – Design principles	217
<i>Whole person care. The goals of medicine. Healing. The spiritual dimension. Suffering. Precarious living. Natural medicine and natural healing. Health, well-being and quality of life. The holistic</i>	

perspective. Integrated care. Integrative care. Complementary medicine.

Chapter 13 – Principles in practice 259

The occupational therapy model. Therapy outcome measures for rehabilitation professionals. Principles in practice.

Chapter 14 – Experimental model 267

An experimental work in progress. Paradigm shift. Medicine and the individual. Informed empiricism and pathography. Specific, non-specific, contextual and meaning effects. Evidence. The context of care. Resistance. Objections to the model. An opportunity too good to miss?

Appendix 14.1 287

Clinical observations in 'The Homeopathic Method'.

PART 5 – REGIME CHANGE

Prologue 293

A minor revolution. A change of emphasis. What will 'different' look like? 'The ravelled sleeve of care.' The shape of the new model. Prescription for a new 'cosmology'.

Chapter 15 – Clinical practice 301

The therapeutic encounter. The heart of the matter. Implications. Finding the time, and making best use of it. Holistic practice. Integrative practice. Health promotion. Health promotion and complementary medicine.

Appendix 15.1 333

Defining a 'quality' integrated therapy service for complementary therapies.

Appendix 15.2 337

Examples of health and self-care promotion from a complementary perspective.

Chapter 16 – Permutations of care 339

The process of care

The many dimensions of care. Informal care. Formal care. Appropriate care. The patient's role. Availability of care. Access to care. Interprofessional awareness. Time, again. Pluralism, integration, or 'transcendence'? Regulation.

Chapter 17 – Medicine, culture and society 371

The context of care

A push-me-pull-you relationship. A special relationship. Humble hubris. Proper hubris. Social healing. The gradient of the virtues. Acquiescence or resistance. The example of complementary medicine. Medicine's cultural influence. The meaning of life.

Chapter 18 – The problem with science 389

The context and process of care

Scientificism. Scientific truth in medicine. The limitations of science. Useful science and wasteful science. Research. A thought experiment. Conclusion.

Chapter 19 – Learning to do medicine 413

The context and process of care

Vocation. A new perspective in medical education. Learning to cure. Learning about cure. Learning to care. Learning about care. Learning to cope. Learning to heal. Learning to collaborate. Interprofessional education. Policy and organisation. The way to learn to collaborate is to collaborate. Holistic medical education. Integrative medical education. Practical implications.

Chapter 20 – Living till we die 449

The context, process and practice of care

Where to draw the line? Aspirations of the human spirit. Medicine's responsibility. Doing too little, doing too much. Spiritual experience. medical implications. Prolonging living, assisting dying. The culture of living and dying. A juggling act.

CONCLUSION 461

The model, the jigsaw puzzle and the bigger picture. Uncertainty. The fixed point. Humble hubris and willingness to change. Realising the vision.
